

Don't Ban Digital Innovation and Consumer Rights!

We ask the Parliament in the revision of these laws to clearly tie circumvention offenses to things which assist piracy, not activities such as playing our own DVDs or games without explicit permission! We ask the Parliament to commit to market freedom and competition in Australia, and refuse to provide new legal weaponry against competitive and innovative technology companies and users, such as Free and Open Source software.

How to use this petition:

1. Get people to understand the problem, and have them sign.
2. Make sure they haven't signed before (ask them).
3. When you have signatures, send all the pages with signatures to:

Don't Ban Innovation Petition

GPO Box 4788

Sydney NSW 2100

Australia

4. We will collate the petitions and submit them to the Attorney General to give to the House of Representatives. We hope that by showing them how many people this affects and how much they care about this issue it will force them to act responsibly when implementing our AUSFTA responsibilities.
